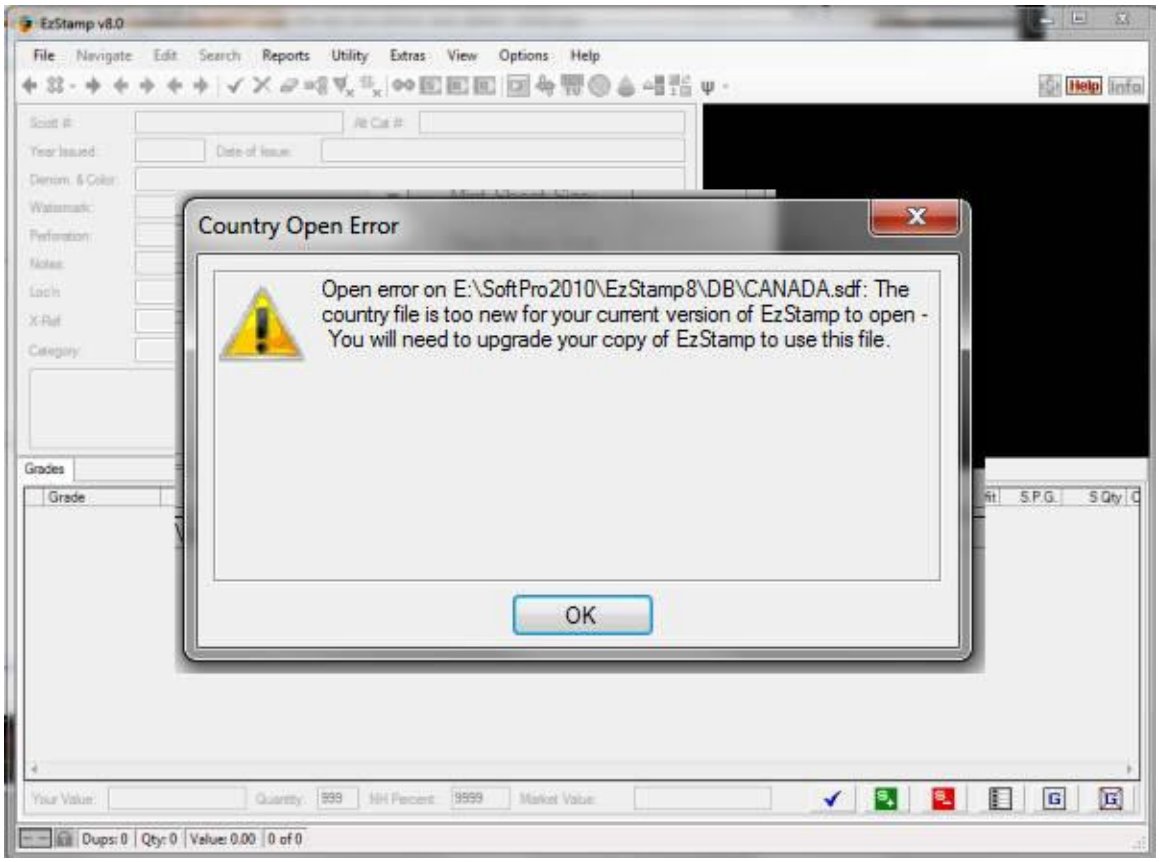
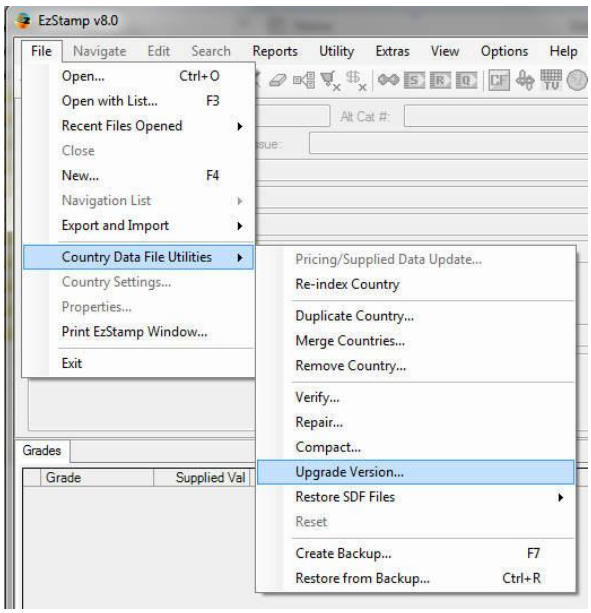
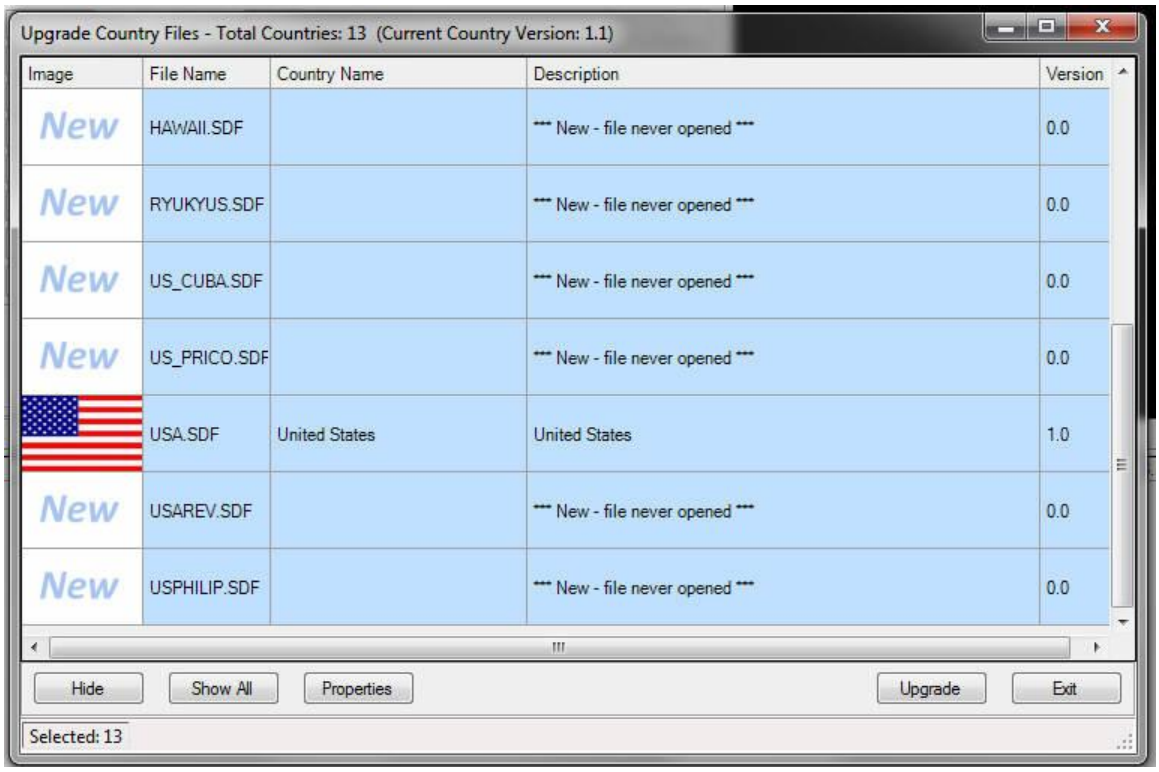
# Effective March 17, 2013: Database Versions Upgraded

**If you have performed a Check For Free Updates after March 17, 2013, the next time you try to open any file, you will see the following warning.**





Since we updated the database structure, you must run the Database Version updater provided in EzStamp as indicated here in these screen shots. This warning occurs because on March 17, 2013, we upgraded the database structure to add new fields for multiple locations. The warning is NORMAL and as intended. Simply select ALL country files & upgrade them from v1.0 to 1.1 as shown in the next screen shot



You must now left click on any file in the list, then Ctl+A to select ALL and then click on upgrade. This will convert all files to the new v1.1 format
